Scroll down to find the Easter egg SummaryA whimsical Easter egg that simulates a Google search page floating underwater with various sea creatures. StatusDiscontinued(Recreated by elgooG)The Underwater Easter egg was a visual and interactive feature created by Google, allowing the search results page to appear as if it was underwater. This feature was a fun and lighthearted way to add some whimsy to the search experience. It is not exactly known when this Easter egg was launched but it was sometime around 2012.To discover the Easter egg, users had to search for the term "Google Underwater" or "". Upon searching, the entire search results page would appear to be submerged under water, with various sea creatures swimming around. The search bar would also float on the top of the water.The underwater search results page would include various animated fish, turtles, and other sea creatures swimming across the screen, and the search results themselves would bob up and down as if floating in the water. The overall effect was a playful and engaging visual experience that transformed the typical search results page into an underwater scene.This Easter egg was primarily a visual treat and did not offer any interactive elements besides the ability to still perform searches. It was available on both desktop and mobile devices and added a touch of fun to the otherwise straightforward Google search experience.The Underwater Easter egg was popular among users and was widely shared on social media platforms. The unique visual transformation of the search results page was praised for its creativity and was considered a fun surprise that distinguished Google's search experience. The Easter egg was enjoyed by users of all ages, and it generated positive feedback for its lighthearted nature.It not only amused users but also showcased Google's ability to create visually appealing and engaging features that added value to the overall search experience. The Easter egg created a memorable and fun distraction from the usual search routine.Google officially discontinued the Underwater Easter egg after a period of time, as is common with many of their interactive features. The removal was in line with Google's practice of updating and rotating its Easter eggs. While the removal did disappoint some users, the Easter egg has been preserved by platforms like elgooG, allowing users to still access the feature.The original Easter egg is no longer available on Google's search engine, but it remains accessible through recreations, which offer the same visual underwater experience as the original, thus ensuring that users can still enjoy the fun and lighthearted nature of the feature.This restored version by elgoo.im is a near-perfect visual and functional replica of the original, offering an identical experience. Furthermore, it includes enhancements in certain details and boasts excellent support for both light/dark themes and mobile access.To experience the restored Underwater Easter egg on this page, click the button at the top of the page to enter the dedicated page for this Easter egg. Once on the dedicated page, the entire search results page will be submerged underwater, with various sea creatures swimming around. The search bar floats on the top of the water.The restored version on elgooG provides an identical experience to the original Google Easter egg, offering the same visual transformation of the search results page. The animated fish and other sea creatures perfectly replicate the original effect, providing the same engaging and fun visual treat.Click on the button at the top of this page.Observe the search results page filling with water.Watch as various sea creatures swim across the screen.Notice the search bar floating on top of the water.Interact with the page as you normally would, while enjoying the underwater theme.The restored Easter egg on elgooG is designed to function seamlessly across various devices and platforms. The recreation maintains all the key visual elements of the original, ensuring users have the same experience as before. Additionally, it has been optimized for different browsers and devices, thus ensuring the underwater scene is consistently displayed.The Underwater Easter egg was a whimsical and creative feature that transformed the Google search results page into an underwater scene, offering a fun and lighthearted visual experience. Though discontinued by Google, it has been carefully restored on elgooG, allowing users to enjoy this unique digital artifact once more. This recreation highlights the importance of preserving digital creativity and invites users to explore other restored gems.Explore the restored Underwater Easter Egg on elgooG and discover other restored gems, and immerse yourself in the world of digital nostalgia. Scroll down to find the Easter egg SummaryAn interactive Easter egg that transforms Google Image Search results into a playable game of Atari Breakout. StatusDiscontinued(Recreated by elgooG)The Atari Breakout Easter egg was launched by Google in May 2013, commemorating the 37th anniversary of the classic Atari game "Breakout". This interactive feature transformed the image search results into a playable game of "Breakout," bringing a piece of retro gaming to the search page.To discover the Easter egg, users had to search for "Atari Breakout" in Google Images. After the image results loaded, the page would automatically transform into a playable version of the game, with the images becoming the bricks that users needed to break.The game was played using a paddle at the bottom of the screen, which users could control with their mouse or touch. A ball would bounce around the screen, and the goal was to break all the image bricks by bouncing the ball off the paddle. As users broke more bricks, the game would get progressively faster and more challenging, similar to the original Atari game.The Easter egg was a fun and engaging tribute to the iconic arcade game and was designed to provide a unique and interactive experience for users. It was available on both desktop and mobile devices, providing a nostalgic gaming experience directly in the Google search interface.The Atari Breakout Easter egg was extremely popular among users and garnered significant media attention. Many users shared their experiences on social media platforms and gaming forums, celebrating the creative and nostalgic nature of the feature. The Easter egg was widely praised for its ingenuity and faithful recreation of the classic game, demonstrating Google's ability to blend gaming with search.The Easter egg not only provided entertainment but also served as a cultural reference, introducing a classic game to a new generation. It created a positive user experience and showcased Googles capacity to create interactive and memorable features.Google officially discontinued the Atari Breakout Easter egg after a period of time, as part of its usual practice of updating and rotating special features. The removal was in line with their policy of cycling through various Easter eggs and special interactive elements. The discontinuation disappointed many who enjoyed the surprise, but the Easter egg was preserved by platforms like elgooG, ensuring that fans could still experience it.While the original Easter egg is no longer available on Google's search engine, it remains accessible through recreations, which offer the same interactive experience as the original, allowing fans to continue enjoying this piece of digital gaming history.Update: Since January 23, 2025, Google has officially introduced a mini-game called "Block Breaker" on its SERP page. This game is similar to ours but features more levels and enhanced playability. When you search for "Google Block Breaker" or just "Block Breaker", you may see this Easter egg.This restored version by elgoo.im is a near-perfect visual and functional replica of the original, offering an identical experience. Furthermore, it includes enhancements in certain details and boasts excellent support for both light/dark themes and mobile access.To experience the restored Atari Breakout Easter egg on this page, click the button at the top of the page to enter the dedicated page for this Easter egg. Once on the dedicated page, the game will load with a set of image-based bricks at the top. Users can control the paddle at the bottom with their mouse or touch to break the bricks with the ball.The restored version on elgooG provides an identical experience to the original Google Easter egg, allowing users to play the game as it was intended. It accurately recreates the original functionality, from the game mechanics to the visual layout, ensuring users experience the same level of engagement and nostalgia.Click on the button at the top of this page.Wait for the game to load.Use your mouse or touch to control the paddle.Break the image bricks with the ball.Clear the screen by breaking all the bricks.The restored Easter egg on elgooG is designed to work seamlessly across various platforms, including desktop and mobile. The recreation maintains all the key gameplay elements of the original, ensuring that the gaming experience is as accurate as possible. Furthermore, it is optimized to provide a smooth experience across different devices and browsers, allowing for a consistent and engaging interaction.The Atari Breakout Easter egg was a creative tribute to the classic arcade game, bringing a retro gaming experience to the Google search platform. Although discontinued by Google, it has been carefully restored on elgooG, thus allowing users to enjoy this unique feature once again. This restoration underscores the importance of preserving digital cultural artifacts and encourages users to explore other restored gems.Explore the restored Atari Breakout Easter Egg on elgooG and discover other restored gems, and immerse yourself in the world of digital nostalgia. If you havent been living under a rock for the past 20-odd years and have access to the Internet, then you know exactly what Google is. Its possibly the best search engine out there, helping you access all the information you need, and you may already be familiar with this fact. Along with useful information, Google can also provide strange and cool results for secret search queries, called Google Easter Eggs. We have compiled a list of 55+ hidden Google Easter eggs to make your Google surfing more fun. In 2022, NASA launched its much anticipated Double Asteroid Redirection Test (DART) mission as a test of its first planetary defence technology. Under this mission, NASA intentionally crashed a spaceship into an asteroid to change its course of direction. While it all sounds too nerdy, Google turned it into an easter egg in Search results. Now, when you type Dart mission in the Google search, you will see a satellite crashing into an asteroid in the middle of your screen. When Robert Pattinsons new Batman movie released, Google also went in on the hype with a brand new easter egg. Months later, it still works, and if you havent tried it out, you need to take a look at it. Simply search for Bruce Wayne, Gotham City, or Bat-Signal. You should see a bat-signal icon beside the information card on the screen. Click on it to see a bat signal light up on the search results page, and Batman flying across your screen as well. Google celebrated the 25th anniversary of Friends by launching six new easter eggs, one each for the main cast. When you search for Monica, Chandler, Phoebe, Joey, Rachel, or Ross (you have to use the full name), Google will provide you with an easter egg icon just as shown in the picture below. My favorite easter eggs are for Phoebe and Ross. In the former, when you click on the guitar, it starts playing the famous Smelly Cat song with a cat walking on your screen. In case of Ross, it recreates the famous Couch Pivot scene. We have linked all the easter egg pages below so you can just click and check them out. Majority of Googles Easter eggs are hidden in its most popular product (i.e. Google Search), and can be accessed simply by using a specific word or phrase as the search string. Here are a few of them: Wanna roll a little? Type in Do a barrel rollin the Google search box, and youll see the entire webpage rotate clockwise by a full 360 degrees. Google sure serves you with the best search results, but it also knows how to show you a good time. You can enjoy some popular arcade games including Pacman, Solitaire, Snake game or Tic Tac Toe, right from the results. You simply need to do a search for any of the aforementioned titles and hit Click to Play to immersive yourself in some fun games. This has to be one of my favorite Google Easter Eggs. Google can help either you or your kids learn whatever sound an animal makes, simply by using a search query like, what sound does a cow make? or what sound does a cat make? You then have to tap the speaker icon next to the animal name to hear the sounds. This is one of the best Google Easter Eggs for kids as its not only informative but also cool. This teapot Easter egg was designed to appease server and SEO enthusiasts and it was supposed to be an April Fools Joke back in 1998. It wasnt designed for implementation, however, Google still did go ahead with the idea. You can check out the page right here. Well, apart from spewing out numbers in reference to popular works of fiction, Google is also hiding another calculator-based Easter egg under its belt. It refers to One as the loneliest number, which could be a reference to Harry Nilsons popular song under the same name. If you havent managed to get over the fidget spinner trend, well, Google intends to be in line with the times. It already displayed a number spinner when you searched for spinner but it added a fidget spinner to the same after they gained immense popularity last year. While many of these Easter eggs work both on the mobile and desktop, Bubble Level is a mobile-only Easter egg which turns your smartphone into exactly what it says a bubble leveler. You can search for the same and place your smartphone on any surface to tell if its horizontal or vertical. Google is also quite considerate to musicians and has a metronome Easter egg available via its search engine. Anytime you want an audible click while writing music or playing an instrument, youcan now turn to Google for it. Google also offers you a random number generator, which can sometimes come in really handy, but thats not the Easter egg here. The search giant is hip and emojis are cool, so when you set the min and max limits both to 100, youll see the 100 emoji. And setting a max limit of more than 10 digits will show you a dizzy face emoji. If you spent your childhood with Super Mario Bros or Sonic the Hedgehog, then you will love this Google Easter egg. When you search for either of the two games, the information card available on the right shows a notable entity from the game. An animated question mark and the signature Mario points sound for the former whereas the Hedgehog rolls into the picture for the latter. Now that were on the topic of games, how about playing another one? Called Image Breakout, its Googles take on the classic Breakout arcade game, developed and published years ago by Atari. To access this Easter egg, do a Google image search for the Atari breakoutstring, and the images in search results will turn into colorful bricks, which you can smash with the ball, while bouncing it off the paddle. If you manage to finish the game, the search automatically redirects to results from any random Image search. This Google Easter Egg is especially fun. Search for Zerg rush,and your search results will be attacked from all sides by hordes of O alphabets. The Os can be destroyed by clicking on them repeatedly. The game ends either when all the search results have been destroyed, or when youve defeated all the Os. The high score can be shared as well. Dont like things to be symmetrical? This is just the Easter egg for you. Key in Askewas the search term, and the entire webpage will be skewed, or tilted to the right side. Like pretty much all great things, Google also had humble beginnings, when it started off in 1998. Wanna know how the most popular search engine looked back then? Use Google in 1998as the search phrase, and go back in time. No matter how big or small a dispute is, it can always be sorted out by flipping (or tossing) a coin. And thanks to this Easter egg, you dont even need to have one in your pocket to toss. Search for Flip a coin, and see whether you get Heads or Tails. There are numerous games that involve rolling the ever familiar six faced die. And having Google do that for you just makes it that much cooler. All you have to do is run a search for Roll a die, and youll get a random number from 1 to 6. Even the worlds most popular search engine cant escape from the pull of gravity, and that is something clearly evinced by this Easter egg. Go to google.com, type in Google Gravity, and click on the I am Feeling Lucky button. Youll see the webpages UI elements crumble to the base, all thanks to gravity. But thats not all, there are various other commands you can type in search engine like Google Reverse Gravity, Google Underwater Gravity, and more which do fun and random stuff to your Google homepage. Here are some of the best Google Gravity search terms you should try. Google Gravity Google Reverse Gravity Google Underwater Gravity Google Guitar Google Gravity Sphere Google Space Google Tilt Google Gravity Mirror Google Flat Fall Often Once in a blue moonis a phrase associated with events that almost never happen, or happen rarely. But thats a vague term, and one that Google finds irksome. Search for Once in a blue moon, and find out exactly how much it actuallyis (hint: Its in Hertz). Howd you like your search results blinking at you? That might sound a little weird, but its actually a reference to the namesake tag. Use Blink HTML as the search string, and all the occurrences of the words Blink and HTML in the search results will start blinking. How cool is that? They might not seem much, but Anagrams (words that are formed by re-arranging the letters of existing words) can be a lot of fun. So much, that Google has an Easter egg dedicated to them. Search for Anagram, and apart from the relevant search results, Google will also question whether you meant Nag a ram (which is an anagram formed by re-arranging the letters of the word anagram itself). The practice of recursion involves repeated application of certain recurring procedures. So when you run a Google search for Recursion, Google asks whether you meant to search for, you guessed it right, Recursion. No, the seemingly complicated mathematical expression referenced in this points title isnt some random stuff. In fact, when this expression is plotted on a graph, it creates the shape of a heart. Unbelievable? Search (sqrt(cos(x))*cos(500*x)+sqrt(abs(x))-0.4)*(3-x*x)^0.1, and see for yourself. If someone is seeking the meaning of topics such as the life and universe, one would assume the answer to be extremely complicated. But the answer is actually extremely simple, if you try to look it up on Google. This Easter egg is an ode to The Hitchhikers Guide to the Galaxy series by Douglas Adams. Search with the phrase Answer to life the universe and everything, and youll get the answer as 42. Secret codes and phrases have always been used in the past to communicate sensitive information, especially during wars and other such conflicts. Bletchley park was actually the home for the British code-breakers during World War Two. And a Google Easter egg perfectly pays homage to the importance of the location and the people who worked there. Search Bletchley park, and the youll see the Google search information card on the right play an animated alphanumeric code sequence, eventually spelling out Bletchley park. We generally use Google in our native tongue, but the search engine offers you the option to choose from a variety of different languages. And some of them can be really fun, such as Pirate, Hacker, Klingon, or even Pig Latin, if you understand the lingo. You can activate any of these languages by heading to Settings -> Languages from the bottom right on Googles homepage. 26. Text Adventure Google has always been good with Easter eggs, but the hidden Text Adventure game will have to be my favorite. It sees a Big Blue G looking for all its remaining colored friends from the Google logo and its a pleasant little secret for adventurers. To start this game, you will have to search for text adventure (without the quotes) and open the Javascript developer console by pressing Command+Option+J on your Mac, or Ctrl+Shift+J on Windows. Here youll see a prompt, asking you to type yes to start the game. This Easter egg is a reference to the Festivus holiday (a parody holiday meant as an alternative to the pressures and gatherings of the Christmas holidays season), which features an aluminium Festivus pole. Search Google for Festivus, and youll see the Festivus pole appear at the left of the search results page. Hanukkah and Christmas are probably the most important festivals/holidays for Jews and Christians respectively all around the globe. And if you happen to be in a festive mood, Google can help make things better. Search for Christmas or Hanukkah, and a gorgeous looking thematic header will be overlaid on the top of the search results. If you are a fan of famous American sitcom The Office, you will definitely like Google Search easter egg. Type in DVD Screensaver right away in Google Search and you will see the Google logo hovering on your screen. Will it ever touch a corner? Well, thats a mystery. Every OG fan of the classic Sonic game knows whatGreen Hill Zoneis as soon as they hear this term. The Green Hill Zone is the first level in the cult classic original Sonic game, and every time you search for this term, Sonics icon appears at the right of your Google search. The icon also jumps & rolls with its iconic Sonic sound when you click it, and with multiple clicks, Sonic transforms into its Super Sonic form. This Google search easter egg hides the reference to Avatar: The Last Airbenders episode 14 of season 2nd in plain sight. Whenever you search War In Ba Sing Se, Google tries to correct you by showing, Did you mean:there is nowar in ba sing se.This term became prevalent when the Avatar team traveled to the capital city of Earths Kingdom, Ba Sing Se, to discover that the government had covered up the ongoing war. If you are someone from Gen X or a crossover 90s kid, you would know that Pluto, once considered the ninth planet, was removed from the planetary status, and we were forced to forget what we learned about it in elementary school. This Google search easter egg indicates this only, as whenever you search Pluto, Google pays homage to our favorite dwarf planet in the knowledge panel. The online collaborative productivity suite of Google also has some really neat Easter eggs of its own hidden in it. Here are some: The LGBT community has faced discrimination for a really long time, and even though things are steadily improving, theres much work left to be done. And thanks to this Google Docs Easter egg, showing off your LGBT pride is easier than ever. Simply open up a blank Google Spreadsheet, and type in the five letters of the word PRIDEin five adjacent cells, one letter in each cell. As soon as you do that, the columns will be highlighted in the different rainbow colors, symbolic of the LGBT community. Conways Game of Lifeis anamazing game, devised by BritishmathematicianJohn Horton Conway comprises of cells and how they interact with their neighbors. If you want to give this game a shot, well, you cannot as youre merely a spectator to the blue-gray cells that show up over the search results. However, if you want to try an interactive version of the game, then head to Google Docs andpressCtrl+Alt+Shift+E, followed by Ctrl+Alt+Shift+C, to launch the table where you can try out Conways Game of Life. Google Search is not the only place where the tech giant has hidden some interesting secrets for users to discover, Google Maps is also a treasure of some sweet easter eggs. Here are some of the best Google Maps easter eggs you need to experience right now. Everyone is aware of the mystery of Loch Ness monster. Does it exist? Yes, in Google Maps (or at least a caricature of it). Google has added a sneaky little cartoon of Loch Ness that appears when you search Loch Ness Monster in Google Maps. Pegman or the tiny yellow-colored man at the bottom right of the screen turns into a cute Loch Ness monster with a hat. Experience the magic the Harry Potter and and wander the streets of Diagon Alley with this Google Maps easter egg. Search Diagon Alley on Google Maps and enable street view. Now, you can visit the famous Olivers wand and explore around the magical streets in 360 degrees. This is another easter egg on Google Maps that turns the pegman into a UFO. Type in Area 51 or Groom Lake, Nevada in Google Maps and pickup the yellow-colored pegman to see it turn into a cool UFO. Similarly, search results for Hawaii on Google Maps changes the pegman into a mermaid. Do you know you can actually play the famous snake game on Google Maps? Google added the game is an easter egg on April 1, 2019 as a part of its April fools day campaign. While it was directly available in Google Maps earlier, the easter egg has now been removed but you can still play the game by visiting this link. You can choose from Cairo, Sao Paolo, London, Sydney, San Fransisco, Tokyo or the entire world for the game. In this section, weve compiled 20 cool Easter eggs. From light-hearted games to curiosity-driven eggs, its got plenty to tickle your fancy. Here we go! This one has long been one of my favorite Google Easter eggs thanks to an interesting story which is related to The Hitchhikers Guide to the Galaxy by Douglas Adams. In the book, Adams stated that The answer to the ultimate question of life, the universe, and everything is 42. When fans couldnt decode the meaning of that magic number, the writer said that it was nothing but a joke. Despite the funny revelation, Hitchhikers fans still think that the 42 holds several secrets up its sleeve! Imagine a situation where Google doesnt seem to be working on your device, wouldnt you want to quickly find out whether or not the search engine is down? Most probably, yes. Save this interesting Easter egg for such times. Whether you are a fitness freak or a health-conscious person, this Easter egg is specifically designed for you. Simply, write the name of any food followed by nutrition (i.e walnut nutrition) and carry out a Google Search of nutrition to find out all the nutrition info. Well, Ive specifically saved Google Sky for those who dream to go for a long space voyage. This Easter egg is thoughtfully designed and allows users to explore the space with precision. From letting you wander in the wilds of the solar system to diving deep into constellations, its got a lot to keeping you amazed. Just a glance at 3D easter egg and you would come to know that its pretty special. If you dont believe me, simply hit this link to see an awesome spinning egg in 3D along with an out-of-the-box calculus. I guess you are already wondering why I have listed out this Easter egg as there is nothing unusual about it. Let me tell you that it applies to not only dogs but also other animals. So, if there is any animal which sounds you dont know, use this Easter egg to know that. If you are fond of nice-looking fonts, this is your thing. You can use this Easter egg to discover a ton of attractive fonts. Whats more, it also allows you to compare fonts based on the precise fonts that appeal to your fancy. While many of you would be aware of this Google Easter egg, I think there are quite a few people who might not have come across it. Thats why I thought its worth mentioning it in this extensive roundup of the top Easter eggs. As for functionality, it allows you to quickly convert currency and mass. So, whether you want to convert kilograms to pounds or Euro to USD, it can get the job done for you. As someone who has a huge penchant for light-hearted games, I have found Pac-Man really fascinating. Simply, search for Pac-Man in the Google Search and then use the handy arrow keys to play the video game to your hearts liking. Perfect for the times where the monotonous feeling is kind of killing your mind and you wish to get started with interesting gaming right away! When it comes to hidden Easter egg, Marquee HTML is the one name that has never failed to amaze me. So, what makes it so fascinating? Well, when looking for Marquee HTML in Google Search, you will find out that the results count will move slowly move from right to left. While there is nothing striking about this Easter egg, Im sure many of you would like to have it, especially the ones who have a keen interest in celebrities and wish to know almost everything about them. If you ever want to know the height or age of any celebrity, simply type the name followed by age or height and the big G will quickly show the result. Times when the Internet is playing hide and seek and you dont want the downtime to completely put you off, a game like Dinosaur can come into play really well. So, the next the internet connection goes down simply press the space bar and the arrow keys to kickstart the dinosaur game. As its pretty easy to play, you dont need to go through any learning curve to master it. Do you often seem to get stuck with spelling or reading a big number? If yes, this cool Easter egg can be the right answer to your needs. Simply, bring in the big G and then type in the number=English. Then, leave the rest to the search engine. Have a liking for eye-catching animation? This is exactly what you need to not only explore top-notch animation but also indulge with interesting gameplay. To get going, search for Carmen Sandiego in Google Earth and then follow the Carmen Sandiego across the globe by indulging in the light-hearted game and discovering clues. Time to take a short trip to mars! Well, if you are wondering how its possible, let me tell you that this Easter egg can let you take a quick trip to the mars. Whether you are curious about the universe or love to explore the unknown, you should keep it in mind. I bet not many of you know that Google has a hidden timer. Times when you wish to keep a tab on the time while working on a task, it will come into the picture seamlessly. Just prop out Google Search and type in something like Timer 2 hours and you are ready to go! For those love birds who are always on the lookout for something that can bring a lot of smiles on the face of their beloved friend, Valentines Day is the way to go. With this fascinating Easter egg, you will get a loving present for your Valentine with a unique mathematical calculus. Of course, it will be a bit difficult to decode the message, it can surely light up the moment. This one is primed for curious minds or someone who always wants to learn something out-of-the-box. So, the next time you want to learn something unique, head over to Google Search and type in Fun Facts. Voila! Google Will amaze you with an interesting fact. Ever wished to give a close look at the moon but give up on the idea so you didnt have the tool to get it done? If yes, Google Moon is the right answer to your longing. To start your voyage on the moon, hit this direct link. Featuring 3D models of rovers and landers as well as 360 photo panoramas, this hidden Easter egg has you fully covered. Last but not least Bakers Dozen (aka a long dozen or devils dozen) is one of the coolest Google Easter eggs that I have come across. Its also got an intriguing story wrapped inside. When you search for Bakers Dozen in Google, the number 13 would appear would take center-stage on the screen revealing and erstwhile practice of medieval English bakers offering an extra loaf when selling a dozen. It was done to prevent bakers from cheating customers and selling light loaves of bread. In 2018, Google added breathing exercises to its search results. When you search Breathing exercise or Deep breathing in Google Search, it shows a fun exercise that you can take in addition to glancing over the search results for the term. Simply click on play and Google will guide you through exercises that you can perform to calm yourself during distress. To celebrate diversity and show its solidarity to Gays, Lesbians, Bisexuals and trans people, Google has an easter egg hidden right into the search page. When you search for LGBT on Google, you get an animated heart wrapped in pride colors in the Knowledge panel on the right side of the screen. Click on it and you will see confetti showered on your display with LGBTQ flags at the bottom. Google has a tradition of marking special events with interactive doodles. For the Chinese New Year of the Snake in 2013, they crafted a playful snake game doodle. Drawing inspiration from the beloved Nokia snake game, players could steer the snake using their keyboard or mouse, collecting items and dodging obstacles. Accompanied by festive Chinese New Year melodies and firecrackers, the game added to the holiday's cheer and was featured on Google's homepages in Hong Kong and Taiwan on February 9th, 2013, and in other regions on February 10th, 2013. Google is the go-to search engine for so much, including trending topics. People often use it for things like details of a new movie release, or how to play popular games like Wordle. Sometimes, Google itself likes to get in on the excitement and give users a little surprise when they search for certain trending subjects. In a way, its the search engines answer to newsjacking, something we and many other PR pros do in the digital PR industry. The nearly universally used search engine calls them Google Easter Eggs. The Easter Eggs can be as simple as a witty response to your query, or intricate enough to take over your entire search screen. For example, when Avengers Endgame was released, Google recreated the supervillain Thanos infamous snap. After clicking his glove, half the results disappeared from the page! So, which Google Easter Eggs are Americas favorites? We analyzed more than 1,000 Google search trends to figure out the 50 most popular in the nation, and the top 10 Easter Eggs you probably havent heard of before. Some of the top Google Easter Eggs in the nation are games! Americans are fascinated with solving Wordle and also checking out Googles Wordle Easter Egg. When people search for Wordle, Googles logo turns into the game! The logo acts like someone solving the puzzle and ends, of course, with GOOGLE in the boxes. Three other games are in the top 15: Solitaire (3rd), flip a coin (8th), and Minesweeper (14th). Another popular type of Easter Egg has to do with movies and TV shows. While the Thanos snap didnt make the top 50 most current popular Easter Eggs, The Last of Us certainly did. The Easter Egg ranked 9th. When you search the zombie-inspired TV series, a mushroom button appears. If you dare to press it, cordyceps, the fungus that caused the zombie outbreak, takes over the screen! America also loves the Easter egg for the popular K-pop boy band, BTS, (13th). It lets users pop purple balloons while hearing messages from band members. Other favorites include watching Sonic the Hedgehog roll by (15th), and helping Mario get a coin for 200 points (18th)! Americans are also fascinated by all sorts of furry pets, and Google can tell. Nine of the most popular Google Easter Eggs have to do with dogs and cats. When you search cat, dog, puppy, or kitten the search engine also includes a paw button. If you press it, dont be surprised to see a virtual cat or dog get their paws all up in your business! One fun Easter Egg changes the look of the entire screen. If you search askew, which is something that isnt level, the screen tilts just like the Leaning Tower of Pisa. Separately, if you search recursion Google asks Did you mean: recursion? This is exactly what you typed and an example of recursion itself! Some of the Easter Eggs are pretty witty. For example, when searching for the late Alex Trebek, Google will ask you Did you mean: Who is Alex Trebek? If youre a Jeopardy fan, Google will make sure to give you the answer in the proper Jeopardy format. While Googles Easter Eggs are meant to be a surprise, some are a little too tough to uncover! Good news: we did the work of finding them for you! These are some of the Easter Eggs with the least monthly searches. A couple are based on real historic events. Chicxulub is a crater in Mexico that was made by the infamous asteroid that is believed to have killed most of the dinosaurs in the world. When you search for it, an asteroid fires across the screen! Meanwhile, Bletchley Park was an estate used for code-breaking during World War II. If you find yourself Googling it, its name first appears in code! Meanwhile, when you look up dinner for one a tiger appears. Click that, and youll see a brief scene from a 1960s comedy showing the butler tripping over a tiger rug. Prepare to take a spin if you search z or r twice. As for the top three hidden Easter Eggs, some are a little cheeky! If you search loneliest number of the number of horns on a unicorn, Google has the answer for you. It shows the number 1 on a calculator. The top Google Easter Egg is the most secret probably because its hard to write out. If you type (sqrt(cos(x))*cos(500*x)+sqrt(abs(x))-0.4)*(3-x*x)^0.1 the math problems is solved to show a heart! Love that. A quick Google search can be about as mundane as it might get, but Easter Eggs add amusement to what would otherwise be a few moments barely worth remembering. The internet is a funny place, and Google is simply helping us remember that. Methodology To determine the top 50 Google Easter Eggs & top 10 hidden Easter Eggs, we analyzed Google search volume of 1,182 terms related to Google Easter Eggs such as Thanos snap Easter Egg, Google gravity Easter Egg, and Wizard of Oz Easter Egg over the period of March 2022 to February 2023. The top 50 Google Easter Eggs were determined by examining which ones had the most searches. Meanwhile, the top 10 hidden Easter Eggs were the ones with the least searches. For media inquiries, please contact media@digitalthirdcoast.net. Fair Use When using this data and research, please attribute by linking to this study and citing digitalthirdcoast.com. This past weekend, our team at Digital Third Coast stepped Google Ads rep recommendations, particularly for automated bidding, require careful Mistakes and missed opportunities when remarketing campaigns in Google Ads, Google Search isnt all just about finding information. The developers have hidden a bunch of fun surprises throughout the years, known as Easter Eggs. Whether youre a curious explorer or someone looking to add a bit of fun to your day, these Easter eggs offer a delightful break from the ordinary.In this article, well dive into 28 of the most entertaining Google Easter eggs and secrets, each one ready to turn your search into an unexpected adventure.1. Classic Easter EggsGamesWho needs a separate gaming console when you can play directly in your search results? Google offers a surprising variety of classic games.Pac-ManSearch for Pac-Man and fire up a nostalgic game of chasing dots and avoiding ghosts. And, if you click the down arrow underneath youll see all of Googles other games that you can play (and the same goes for the rest of the games)SolitaireTest your card-shuffling skills with a game of Solitaire. Search for Solitaire and get dealing. Once you click play, the game will appear in the centre of your screen, you can choose between easy and hard and then get dealing.Tic Tac ToeChallenge a friend or the AI to a game of Tic Tac Toe (or play yourself if youre really that bored). Simply search for Tic Tac Toe and get playing. All you need to do is click on the board as to where you want your X to be.MinesweeperPut your memory and deduction skills to the test with a game of Minesweeper. Search for it and see if you can avoid those hidden bombs. Click Play, choose your difficulty level, and click away.Dinosaur GameThis hidden gem might be the most famous Google Easter Egg. If your internet connection ever drops, hit the spacebar and youll find yourself playing a side-scrolling dinosaur game to avoid cacti.Personally, I find this game so addictive that I forget about my internet struggles.Search TweaksDo a Barrel RollSearch for Do a barrel roll and watch your search results perform a 360-degree spin, referencing the Star Fox video game series.The now-famous phrase do a barrel roll originated in the 1997 video game Star Fox 64. Peppy Hare, a character known for his frantic advice, would constantly instruct the player to perform this manoeuvre to dodge enemy fire. The internet meme arose from the urgency and repetitiveness of Peppys pleas.Google in 1998Take a trip down memory lane with a search for Google in 1998 and see a retro version of the Google search layout. We really have come a long way and its nice to be reminded of that from time to time.AskewFeeling a bit off-kilter? Search for askew and watch the search results page tilt slightly to one side. Trying this Easter Egg wont disrupt your usual Google experience. Once youre done having fun, your search results will automatically return to normal.FestivusFor all your Festivus needs, search for Festivus and a celebratory pole will appear on the screen.Seinfeld introduced the world to Festivus, a fictional holiday observed on December 23rd. This anti-consumerist celebration throws out the traditional trappings for a Festivus pole (no tinsel!), a family dinner filled with airing of grievances (telling your loved ones exactly what you think!), feats of strength (think wrestling matches, not gift-wrapping), and a healthy dose of sarcasm.Even minor victories are hilariously dubbed Festivus miracles.Blink HTMLFeeling a bit nostalgic for the early days of the web when text used to flash? Search for blink HTML and watch the bold text on the page start blinking.In 1994, Netscape Navigator introduced the tag, a one-trick pony designed to make text blink on the screen. While intended to grab attention, its become more of a relic of the past but thanks to Google we can be reminded of what it was like.FontsLooking to change things up visually? Googling a font name like Calibri will actually change the search results font to match your search!Not only is this a fun feature for Google to add to its repertoire, but its also very useful because youre immediately made aware of what the font looks like.Interactive ElementsFlip a Coin or Roll a DieIf youre looking to make a quick decision then search for flip a coin or roll a die and Google will give you a random result. Did you know that you can also use a dedicated tool likeFlip Coinbecause it allows you to flip multiple coins at once, which results in more random results.Breathing ExerciseMany people feel stressed on a day-to-day basis. Breathing can really help make you feel a lot better. If you search breathing exercise on Google and scroll past all the sponsored posts youll see a 1-minute exercise that Google leads you through once you press play.MetronomeNeed to keep time? Search for metronome and get a virtual metronome you can adjust to your desired tempo.Spinner & Fidget SpinnerFidgeting fun! Search for spinner and get an interactive spinning wheel you can play with. You can also change the wheel size to include more or less numbers. Alternatively, you can search for fidget spinner and you guessed it a fidget spinner appears.To stop the wheel or the fidget spinner then just click it, to get it going again you just need to click, hold it and spin it.You can switch between the two by toggling the option on the right-hand side.Seasonal Easter EggsThroughout the year, Google gets into the holiday spirit with special animations and logos. Keep an eye out for these festive surprises around when the holiday is near:Halloween: Watch out for spooky ghosts and ghouls in the search results.Christmas: See Santa fly across the screen or build a snowman with interactive elements.Hanukkah: Celebrate with a glowing Menorah lighting up the search page.Kwanzaa: A beautiful golden background adorned with traditional patterns graces the Google search bar, accompanied by a glowing kinara (a seven-candleholder used in Kwanzaa celebrations).Animal SoundsCurious about what a particular animal sounds like? Search for What sound does a cow make? (or any other animal) and Google will provide the answer with a fun audio clip.Fun Facts and WordplayFactsSearching fun facts or Im feeling curious will show you a random fun fact to brighten your day. Clicking on Ask another question will reveal another interesting tidbit.WordplayType in define anagram and Google will playfully challenge you with Did you mean: nerd fame again? (an anagram of define anagram). You can also search for anagram and see a similar result.2. Lesser-known GemsWhile some Google Easter Eggs are widely known, there are a surprising number of hidden gems waiting to be discovered.The Answer to Life, the Universe and EverythingFans of Douglas Adams will appreciate this one. Search for what is the answer to the ultimate question of life, the universe, and everything and Google will reveal the answer is, of course, 42.Where does this come from? In a moment of anticlimactic revelation, Deep Thought, the supercomputer tasked with pondering lifes biggest mysteries in The Hitchhikers Guide to the Galaxy, coughs up the answer to the ultimate question: forty-two. This leaves everyone scratching their heads and Google has cottoned onto it too.Bletchley ParkPay homage to the incredible codebreakers of World War II by searching for Bletchley Park. Google will display a special info card highlighting the historical significance of this location.Forrest GumpFeeling nostalgic for the movie Forrest Gump? Search for Forrest Gump and a runner will appear at the top of the screen, just like in the film. More runners will join him as you spend more time on the page.Tomatina FiestaSearch for la Tomatina (a Spanish tomato-throwing festival) and witness an animation of a jumping tomato appear.Click it, and you can throw virtual tomatoes on the screen, referencing the festivals messy fun. Theres even a button to wash away the splatters afterwards.Mine Your Way to Fun with MinecraftSearch for Minecraft and a grass block button will appear.Clicking it reveals Steves hand in the corner. You can then mine away sections of the screen, revealing a small Minecraft world. Steve even upgrades his pickaxe as you keep clicking!Puppy PrintsSearch for puppy, puppies, dog, or canine and a paw print button will appear.Clicking it will bring out a dogs leg, leaving a paw print with a bark sound wherever you click on the screen.Cat lovers do not fear the same works for cat orkitten.Wordle Takes Over GoogleCalling all Wordle addicts! Search for wordle and the Google logo will transform into a 6-letter round of Wordle which spells out the words COLUMN, GOALIE, and GOOGLE.Pop Culture ReferencesGoogle loves a good pop culture reference.Search for Olivia Newton John and see Did you mean: The One That I Want, referencing her iconic song.Search for the one ring and witness Did you mean: my preciousss, channeling Gollums obsession from The Lord of the Rings.Try wubba lubba dub dub for a hilarious reference to Rick and Morty.Axolotl AdventureSearch for axolotl or lake xochimilco and a friendly yellow axolotl will appear. Click it to discover a doodle celebrating the fascinating creatures of Lake Xochimilco. Here, you can interact by taking pictures of cartoon axolotls when they appear.Bubble TeaSearch for bubble tea and watch a cup filled with bubble tea bouncing on the screen. Click it to unleash a fun doodle where you can add various bubble tea ingredients to your cup.Legally BlondeSearch for legally blonde and a chic pink purse will appear next to the Knowledge Graph. Click it to witness Elle Woods beloved chihuahua, Bruiser, jump out and strut his stuff. This delightful Easter Egg even changes the link colours on the page to pink, matching Elles signature look.Chicxulub ImpactSearch for chicxulub, chicxulub asteroid, or meteorite and witness an asteroid falling on the results page. Brace yourself, as the entire page will shake slightly from the impact!For those who dont know, the Chicxulub asteroid slammed into Earth millions of years ago, leaving behind a giant crater buried beneath Mexicos Yucatn Peninsula. In ConclusionOften, searching the web can feel like a mundane task, where youre simply looking for information without much excitement or entertainment.However, what if you could turn that routine task into a fun and interactive experience? Missing out on Googles hidden Easter eggs means youre not just overlooking some of the internets most delightful secrets, but also bypassing opportunities to inject a little fun into your day.Luckily, Google has embedded a variety of Easter eggs and hidden features that transform the ordinary act of searching into something unexpectedly enjoyable. From classic games like Pac-Man and Solitaire to quirky tricks like Do a barrel roll, theres a whole world of surprises waiting to be discovered. Next time youre on Google, take a break from the routine and explore these hidden gemsyou might just find yourself having more fun than you ever expected while searching the web. elgooG Scroll down to find the Easter egg SummaryTurns the classic Chrome Dinosaur Game into a 3D experience, built on an open-source project enhancing the original endless runner idea. CreatorGoogle (Original 2D Game), Priler (3D Version) StatusActive(Enhanced by elgooG)Take me to the Easter egg The original Chrome Dinosaur Game, also known as the T-Rex game or Dino Runner, is a built-in browser game in Google Chrome. It appears when the browser is offline and unable to connect to the internet. Users can start the game by pressing the spacebar (on desktop) or tapping the screen (on mobile) when they see the "No Internet" message with the pixelated dinosaur. The game is an endless runner, where the player controls a T-Rex running across a desert landscape.The original game is a simple, 2D side-scrolling game with black-and-white pixel art graphics. The T-Rex automatically runs from left to right, and the player must jump over cacti and dodge pterodactyls. The game's speed increases over time, making it progressively more challenging. The score increases as the player runs further. The game ends when the T-Rex collides with an obstacle. The design is intentionally basic, reflecting the situation of being offline and having limited resources.The Chrome Dinosaur Game has become a beloved Easter egg and a cultural phenomenon. It's a simple, yet addictive, game that has entertained countless users during internet outages. It's often praised for its simplicity and its ability to turn a frustrating situation (no internet) into a fun experience. It's also spawned numerous memes, fan art, and even competitive speedruns. The game's popularity demonstrates that even simple games can have a significant impact and cultural resonance.The original 2D Dino game is excellent in its simplicity, however, the 3D version, based on Priler's open-source project, provides an opportunity for users to experience a very popular game from an entirely new perspective. We believe introducing this 3D version to the public would be well-received.The most significant difference is, of course, the shift from 2D to 3D. The original game is a side-scrolling, 2D endless runner. This 3D version, based on Priler's open-source project, provides a behind-the-back, third-person perspective, adding depth and a more immersive feel to the gameplay. While the core mechanics (running, jumping, dodging) remain the same, the 3D environment presents a new visual and gameplay experience. It maintains the core gameplay loop of the original while offering a fresh, visually engaging update.Click the button at the top of this page to launch the 3D Chrome Dinosaur Game. You'll be presented with a 3D version of the familiar desert landscape. The T-Rex runs automatically, and you control its movements. On desktop, use the spacebar to jump, and on mobile devices, tap the screen to make the T-Rex jump. Avoid the cacti and other obstacles. The game gets faster as you progress, just like the original. The objective is the same: survive as long as possible and achieve a high score.Click on the button at the top of this page.The 3D Chrome Dinosaur Game will load.On desktop, press the spacebar to make the T-Rex jump.On mobile, tap the screen to jump.Avoid the cacti and other obstacles.The game speeds up as you progress.The game ends when you collide with an obstacle.The original Chrome Dinosaur Game was created by Google developers as a fun way to pass the time when there's no internet connection. The 3D version, developed by Priler and available as an open-source project on GitHub, builds upon this foundation. It's a testament to the creativity of the online community and the enduring appeal of the original game. The 3D version retains the core gameplay mechanics while providing a fresh visual perspective.The 3D Chrome Dinosaur Game is a fantastic example of how a simple, classic game can be reimagined and enhanced. It offers a new way to experience a beloved Easter egg, bringing a fresh perspective to a familiar challenge. We're excited to host this enhanced version on this website, alongside other restored and reimagined Google Easter eggs. We encourage you to try it out and see how long you can survive in this 3D prehistoric world!What is the Chrome Dinosaur Game 3D?The Chrome Dinosaur Game in 3D is an immersive twist on the iconic Chrome Dinosaur Game, featuring vibrant 3D graphics. You can enjoy this game right here: control of a 3D T-Rex sprinting through a desert landscape, steering clear of obstacles like cacti and pterodactyls. The Chrome Dinosaur Game in 3D offers a delightful way to pass time and relive a beloved classic with a contemporary edge.What is the Chrome Dinosaur Game?The Chrome Dinosaur Game is an engaging, built-in feature of the Google Chrome web browser designed to entertain users when they're offline.You control a pixelated T-Rex needing to leap over cacti and duck under pterodactyls in a desert setting. The game's difficulty ramps up with faster speeds and new challenges. Although it doesn't end, you can aim to beat your highest score, stored on your device.To play, type chrome://dino in your browser or press the spacebar on the "No internet" page. Alternatively, visit this page(to enjoy the game anytime.
